

## Advancing Climate Actions on Resilient and Sustainable Agriculture Food Systems

📅 6 - 18 NOVEMBER, 2022 📍 SHARM EL SHEIKH

#FANRPANatCOP27

### FANRPAN Exhibition Booth

- Date & Time:** 7- 9 November
- Venue:** Stand Number 24
- Overview:** The exhibit will showcase climate-smart, sustainable improved practices and how these will address the challenge of food system transformation in the context of AU Comprehensive Africa Agriculture Development Programme (CAADP) Malabo targets, the SDGs, and Africa Agenda 2063.
- Organizer:** Food, Agriculture and Natural Resources Policy Analysis (FANRPAN)

### The Paris Agreement Aspirations through the Implementation of Nationally Determined Contributions in the COMESA and EAC Regions

- Date & Time:** Wednesday 9 November 2022 | 17:00-18:00 GMT+2
- Venue:** NDC Partnership Pavilion , Sharm El Sheikh International Convention Centre (SHICC)
- Overview:** This side event will also focus on discussions of a common goal for Africa's NDC Implementation with emphasis on NDC financing, review, tracking implementation and inclusion into national investment plans. Additionally, focus will also be on Enhancing knowledge, inclusion & enablers for action on Climate finance and mobilization strategies in the COMESA and EAC regions.
- Organizers:** Common Market for East and Southern Africa (COMESA)  
East African Community (EAC)  
Food, Agriculture and Natural Resources Policy Analysis (FANRPAN)

### Towards Resilient, Sustainable, Transformed African Agriculture and Food Systems

- Date & Time:** Monday, 14 November 2022 | 11:30—13:00 GMT+2
- Venue:** Room Akhenaten (150), Sharm El Sheikh International Convention Centre (SHICC)
- Overview:** The side event will showcase resilience building efforts designed to transform African Agriculture and Food Systems. The event will provide a platform for dialogue and experience sharing among policy makers, scientists, and agriculture experts in the context of the SDGs, and Africa Agenda 2063.
- Organizers:** Food, Agriculture and Natural Resources Policy Analysis (FANRPAN)  
Common Market for East and Southern Africa (COMESA)  
University of Pretoria  
Global Roundtable for Sustainable Beef (GRSB)

## Partner Events FANRPAN Team will Speak At

### CGIAR in Africa: Accelerating delivery of science-based innovations for climate resilience across Africa through partnership

**Date & Time:** Sunday, 6 November | 16:30 – 18:00 (GMT+2)

**Venue:** Food and Agriculture Pavilion P65 – PV23

**Overview:** This event aims to capture lessons learned of what worked and what did not in previous and existing accelerated delivery initiatives that aimed to strengthen climate resilience in vulnerable communities. It will further engage in a multi-stakeholder and partner dialogue on how the CGIAR's RILs can better deliver on their mandates to ensure demand-driven impact on the ground. The event will also foster new collaborative partnerships across Africa through the three RILs.

**Organizer:** CGIAR

### What's the best approach to transformative adaptation for resilient agriculture in Africa?

**Date & Time:** Tuesday 8 November | 10:00-11:30 GMT+2

**Venue:** Food and Agriculture Pavilion

**Overview:** By 2050, up to \$50 billion will be needed yearly for climate change adaptation in Africa. The scale of the challenge requires a transformative response: incremental action is not enough. This event will define transformative adaptation and explore its most promising actions in African agriculture.

**Organizer:** ClimBeR /AICCRA

### The Pathway to Climate Resilient, Net Zero Food Systems: How can science and services help secure global food supply?

**Date & Time:** Friday 11 November | 1700-1745 GMT +2

**Venue:** UK Pavilion

**Overview:** Climate Services are critical to achieving resilience in key livelihood sectors. Taking case studies from both the Global North and Global South, this event will highlight how research has had real, on-the-ground impact on decision making towards the goal of climate resilient, net-zero food systems. This event will showcase cutting-edge science and thought leadership towards the goal of climate-resilient, net zero food systems and highlight implications for policy and decision makers. It will highlight how research has had real, on-the-ground impact on decision making through a range of case studies. Case studies presented will include the Met Office work on UK climate services for Defra focused on food, farming and natural environment and GRCF AFRICAP tools and outcomes, and will be followed by a panel discussion.

**Organizer:** UK Met Office

### Financing Climate Resilient Agriculture

**Date & Time:** Saturday 12 November | 11:00 - 11:45 GMT+2

**Venue:** TBC

**Overview:** This event will demonstrate why smallholder farmers need more resources to cope with climate change. It will acknowledge that smallholder farmers are the most vulnerable to climate change. It recognizes smallholder farmers' willingness to climate adaptation because they depend on a good climate to produce food.

**Organizer:** One Acre Fund

**Showcasing ACIAR's initiatives including the FANRPAN TISA project**

**Date & Time:** Saturday 12 November | TBC

**Venue:** TBC

**Organizer:** ACIAR

**“The pathway to climate resilient food systems : lessons learned from climate services projects across four continents“**

**Date & Time:** Saturday 12 November | 1600-1730 GMT

**Venue:** WMO Science Pavilion

**Overview:** Climate Services are critical to achieving resilience in key livelihood sectors. Taking case studies from both the Global North and Global South, this event will highlight how research has had real, on-the-ground impact on decision making towards the goal of climate resilient, net-zero food systems. This event will showcase cutting-edge science and thought leadership towards the goal of climate-resilient, net zero food systems and highlight implications for policy and decision makers. It will highlight how research has had real, on-the-ground impact on decision making through a range of case studies. Case studies presented will include the Met Office work on UK climate services for Defra focused on food, farming and natural environment and GRCF AFRICAP tools and outcomes, and will be followed by a panel discussion.
